| Learning outcomes      |                                                           | Asse | ssment criteria                                         |  |
| The learner will:      |                                                           | The  | learner can:                                            |  |
| 1.                     | Understand the role and                                   | 1.1  | Identify the role and responsibilities of a first aider |  |
|                        | responsibilities of a first aider.                        | 1.2  | Identify how to minimise the risk of infection to self  |  |
|                        |                                                           |      | and others.                                             |  |
|                        |                                                           | 1.3  | Identify the need for consent to provide first aid.     |  |
| 2.                     | Be able to assess an emergency                            | 2.1  | Conduct a scene survey.                                 |  |
|                        | situation safely.                                         | 2.2  | Conduct a primary survey of a casualty.                 |  |
|                        |                                                           | 2.3  | Summon appropriate assistance when necessary.           |  |
| 3.                     | Be able to provide first aid to an unresponsive casualty. | 3.1  | Identify when to administer Cardio Pulmonary            |  |
|                        |                                                           |      | Resuscitation (CPR).                                    |  |
|                        |                                                           | 3.2  | Demonstrate adult CPR using a manikin.                  |  |
|                        |                                                           | 3.3  | Identify when to place a casualty into the recovery     |  |
|                        |                                                           |      | position.                                               |  |
|                        |                                                           | 3.4  | Demonstrate how to place a casualty into the            |  |
|                        |                                                           |      | recovery position.                                      |  |
|                        |                                                           | 3.5  | Demonstrate continual monitoring of breathing           |  |
|                        |                                                           |      | whilst the casualty is in the recovery position.        |  |
|                        |                                                           | 3.6  | Identify how to administer first aid to a casualty      |  |
|                        |                                                           |      | who is experiencing a seizure                           |  |
| 4.                     | Be able to provide first aid to a                         | 4.1  | Identify when a casualty is choking.                    |  |
|                        | casualty who is choking.                                  | 4.2  | Demonstrate how to administer first aid to a            |  |
|                        |                                                           |      | casualty who is choking.                                |  |
| 5.                     | Be able to provide first aid to a                         | 5.1  | Identify whether external bleeding is life-             |  |
|                        | casualty with external bleeding.                          |      | threatening.                                            |  |
|                        |                                                           | 5.2  | Demonstrate how to administer first aid to a            |  |
|                        |                                                           |      | casualty with external bleeding.                        |  |
| 6.                     | Know how to provide first aid to a                        | 6.1  | Recognise when a casualty is suffering from shock       |  |
|                        | casualty who is in shock.                                 | 6.2  | Identify how to administer first aid to a casualty      |  |
|                        |                                                           |      | who is suffering from shock.                            |  |
| 7.                     | Know how to provide first aid to a                        | 7.1  | Identify how to administer first aid to a casualty      |  |
|                        | casualty with minor injuries.                             |      | with:                                                   |  |
|                        |                                                           |      | • Small cuts                                            |  |
